Health-tech Integration

### Quick Stats

8+ Topics

5+ Projects

*“Innovative software developer and medical student at the University of Ghana. I design and build interactive web applications, gamified experiences, and data visualization*

*dashboards with an emphasis on elegant UI, performance and the intersection of health and technology.*

## Selected Projects

Offline quiz app, animated confetti, local leaderboard, CSV import/export, responsive UI.

**Game • Web App**

Premium real-estate interface showcasing units, amenities, and booking flows. High-fidelity visuals and gold-themed brand styling.

**Real Estate • UI/UX**

Modern, responsive marketing pages with unit filters, gallery, and contact lead flows optimized for conversions.

**Real Estate • Frontend**

Brand experience for luxury apartments — identity, site design and interactive listings with premium aesthetics.

**Real Estate • Branding**

Interactive analytics UI with charts and filters for real-time insights and KPI tracking.

**Dashboard • Data**

Multiple portfolio builds focused on polished micro-interactions and mobile-first design.

#### Portfolio • UI

## Experience & Projects

- Designed and built BrainBlast — an offline interactive quiz app with admin tools and leaderboard.
- Delivered multiple premium apartment website interfaces (The Crowne, Jada Residence, SignatureGH).

- Created high-fidelity prototypes and landing pages optimized for conversions and brand alignment.
- Built data dashboards and visualization prototypes used for presentations and stakeholder reviews.

## Education & Certifications

- Medical training combined with interest in digital health and clinical workflow optimisation.

## Interests & Strengths

Health-tech product design • Gamification • Data storytelling • Elegant UI animations • Problem solving
